HEADLINE NEWS

The Place of Place in Higher Education's Next 100 Years

While the college and university campus has survived and prospered through wars, social unrest, hurricanes, floods, and wild economic gyrations, some think that the Digital Revolution may pose the greatest threat to these sacred spaces. An APPA film entitled *Edifice Rex: The Place of Place* addresses the sea changes our campuses face. Produced and written by Richard Katz, it evolved from a 2013 APPA visioning session. The film was presented to members at the APPA 2014 Centennial conference in San Diego, and is available in its entirety on YouTube: https://www.youtube.com/watch?v=zPqXguuM_el&list=UUMT-LWWMuzfooWqSFSc48ZA

Act Soon to Take Advantage of Early Registration Discounts for the 2014 ACUHO-I/APPA Housing Facilities Conference

Discounts end September 17

The Association of College and University Housing Officers - International/APPA Housing Facilities Conference is a partnership event catering to all professionals with an interest in creating and improving campus housing facilities. Programming will cover areas such as best practices for facility

operations, sustainability, maintenance, construction, and renovation. The 2014 ACUHO-I/APPA Housing Facilities Conference will be held October 27-30, 2014 at the Sheraton Kansas City at Crown Center in Kansas City, Missouri. Early registration discounts are available through September 17. [Learn more](#). [Reserve your spot](#) today.

Plan Supervisor's Toolkit Training into Your Fall Schedule

The Southeastern region turns into a hub of campus facilities management as SRAPPA hosts several offerings of the Supervisor's Toolkit program. The Toolkit provides what you need to lead in a facilities workplace that is being transformed by intense competition, advancing technology, and the global economy. This structured, open-ended, and pragmatic programming is not solely an educational offering but is also a process designed to help supervisors realize both personal and professional growth. Upcoming offerings:

- September 22-26, 2014, Florida Institute of Technology, Melbourne, FL.

A PPA INFORMATION & RESEARCH

Effective and Innovative Practices for the Strategic Facilities Manager

Edited by Jeri Ripley King

New in the [APPA Bookstore](#), [Effective and Innovative Practices for the Strategic Facilities Manager](#) offers a generous sampling of practices and frameworks that can help you meet the challenges of today, as well as those in the foreseeable future. Ever-tightening resources and pressures to work more efficiently and effectively call for a skill set that is able to assess the environment, advance new initiatives, and help organizations behave more proactively. Written by seasoned professionals in facilities management and campus administration, the six parts and 16 chapters of this book weave themes of communication, collaboration, and delivering services in ways that align strategically with institutional goals.

Price: \$57 (Member Price: \$42)

[Order today](#) !

New Look for the Campus Environmental Resource Center Website

The Campus Environmental Resource Center (ERC) was established to provide individuals and educational institutions with the knowledge and tools to maintain environmental regulatory compliance, improve management, and operate sustainably. The ERC website has undergone significant upgrades. Whatever your role on a campus, this revitalized site can be a great resource. The upgrade impacts two major areas:

1. The site has been updated and configured for use in different device types. Content can now be viewed on a standard computer, laptop, tablet, or smartphone.
2. Content headings have been limited to allow you quicker access to critical information. The home page can be browsed by the updated Campus Tour (which links to physical parts of campus buildings), Topics, Compliance Guide links, News and Updates, Resources, and a newly added item, "Your Role on Campus."

The “Your Role on Campus” option includes separate subheadings for access of information by those in Admin/Leadership, EHS, Facilities, Educators, Students, and K-12. The ERC was developed with support from an EPA grant and partners APPA, CSHEMA and C2E2. Check out the new site at www.campuserc.org.

NACUBO/APP A Key Facilities Metrics Survey

Where measurements occur, then improvements are likely to follow. The National Association of College and University Business Officers (NACUBO) and APPA are collaborating to raise consciousness over some basic key facilities metrics. The goal is for campus finance and facilities professionals to be in alignment on a handful of important annual consumption metrics, such as energy, water consumption, and waste stream output. This brief six-question survey requires you to enter data on your campus’ annual consumption (found on utility/vendor monthly or quarterly) statements. While this requires some minimal effort, knowing this information should prove most beneficial for both facilities and financial strategic leadership.

[Log in to access the 2013-14 NACUBO/APP A Key Facilities Metrics Survey](#) today!

If you have further questions on the survey content, please contact NACUBO staff Sally Grans-Korsh at sgranskorsh@nacubo.org or if you have questions over the actual survey, contact APPA staff Christina Hills at christina@appa.org.

The 2013-14 APP A Facilities Performance Survey Is Ready for Your Data!

Where do you stand when it comes to understanding how well your facilities perform? APPA’s Facilities Performance Indicators (FPI) survey can help you know. The FPI survey helps you:

- Create a balanced performance score card based on critical data findings
- Compare and contrast your facilities operations with other institutions
- Successfully address capital asset realities
- Make the business case for your facilities needs
- Align facilities planning with your institution’s mission and vision

The 2013-14 FPI is now open and ready to take your data. The deadline is December 15, but now is the time to start collecting your data. With an early start you can more easily provide the best picture of how your facility is performing, its successes, and where there is room for innovation. Register today at <http://www.appa.org/research/FPI/index.cfm>. For assistance, contact Christina Hills at christina@appa.org.

Also, note that the 2012-2013 [Facilities Performance Indicators \(FPI\)](#) report is now available. The FPI is free to APPA members who ALSO participated in the survey, and is also available for purchase. To access your 2012-13 FPI report, log in to your myAPP A account page. Under the myResearch heading click the link titled, "FPI Report Access."

APP A Member/Survey Participant Report: Free
APP A Member/Non-Survey Participant Report: \$500
APP A Non-member/Survey Participant Report: \$895
APP A Non-member/Non-survey Participant Report: \$1,000
Access the 2012-2013 Facilities Performance Indicators (FPI) report [today](#).

INDUSTRY NEWS

Colleges and Universities Invited to Compete in GameDay Recycling Challenge

College football fans meet the challenge to reduce stadium waste.

GameDay Recycling Challenge invites colleges and universities across the nation to compete to see which school will produce the least amount of waste in its stadiums and tailgate areas this college football season. Participating schools identify one or more games to report the amount of material diverted through recycling, composting, and via food donations versus the amount thrown away. Winners for each athletic conference will be recognized, with five different categories per conference. National winners will be recognized in two categories: 1) total amount recycled, composted, and donated; and 2) diversion rate – or the percentage of waste diverted from the landfill. Registered competitors represent 15 athletic conferences, including the Big Ten, Big 12, and Ivy League. Colleges and universities are invited to accept the Challenge by registering on GameDayChallenge.org by Sept. 30.

ASHRAE Supports Change to NCEES Education Initiative

A move by United States engineering and surveying licensing boards to remove a requirement for an additional 30 credit hours for obtaining licensure as a Professional Engineer is met with approval by ASHRAE. In 2006, the National Council of Examiners for Engineering and Surveying (NCEES) approved language in its model law requiring the additional 30 hours – roughly the equivalent of a master's degree – to obtain a P.E. license. The requirement was slated to take effect in 2020. At its 2014 annual meeting held Aug. 20-23, NCEES voted to modify that approach, and instead develop an official NCEES position statement that supports additional engineering education beyond a bachelor's degree. The move was applauded by ASHRAE and other industry associations who had opposed the effort over the last eight years. [Learn more.](#)

Johns Hopkins University Reducing Energy Costs and Carbon with On-Site Utility

New Energy System Part of Campus GHG Reduction Plan

A leading on site utility, offering clean electricity, heat, hot water, and cooling solutions to hospitality, healthcare, housing and athletic facilities, is now operating a 75 kW combined heat and power (CHP) system providing an on-site energy solution to Wolman Hall student housing at The Johns Hopkins University in Baltimore, Maryland. Through this Purchase of Power Agreement, Wolman Hall will receive a portion of its electricity and hot water from a 75 kW CHP system, which is owned and operated by the energy company. The University receives a guaranteed discount on the energy produced by the CHP system while reducing their carbon footprint and is only paying for the energy produced while they avoided all capital, installation, and maintenance costs. The CHP system will produce up to 592,000 KWh of electricity and 3,900 million BTU of useable heat annually in the form of hot water. Utilizing a highly efficient CHP unit, Johns Hopkins will offset up to 415 tons of CO₂ per year.

The new CHP system at Wolman Hall is part of the University's commitment reduce greenhouse gas emissions by 51% by 2025. [Learn more](#) .
