Haubold and Reynolds Complete CFaR Project on Recharge Practices

CFaR | Center for Facilities Research

Following a successful blind peer review of their research report, **Glen Haubold**, New Mexico State University, and **David Reynolds**, University of North Texas, are the most recent members to complete a research project through APPA's Center for Facilities Research (CFaR). Their project, *Issues with Recovery and Recharge in Higher Education*, "explores the role that recovery and recharge play in the overall facility budget." An executive summary of their findings will be published in the Jan/Feb 2018 issue of *Facilities Manager*, and the researchers are scheduled to present their paper at the APPA 2018 Annual Conference next August in Washington, DC.
