

Legrand/Wiremold introduces a new energy management and control system combining modular power delivery with an intelligent system to monitor, manage, and control energy use. Unlike panel-based lighting control systems or digitally addressable ballasts, the Covina-enabled Wiremold system is an entirely new approach to energy management. It comprises two scalable, “plug-and-play” components: a modular Wiremold®

power infrastructure and Convia® energy control and management. For more information about Legrand/Wiremold visit www.wiremold.com.

HeatTrak can help facility maintenance and environmental safety supervisors provide a safer environment all season long by reducing the risk of accidents due to snow and ice. Slips and falls due to snow and ice are an ever-present danger

during winter months. HeatTrak, manufacturer of heated matting products for commercial and industrial use, has developed a unique product line of walkway and stair mats in a variety of standard dimensions that can meet the needs of any facility. Made of durable, natural rubber, these mats lie on top of existing outdoor surfaces and may be left outside for the entire winter season. At 40 watts per square foot, they melt snow at a rate of two inches per hour and in temperatures as low as zero degrees Fahrenheit. For

further information visit HeatTrak at www.heattrak.com. ☎

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, e-mail Gerry Van Treeck at gvtgvt@earthlink.net.
