Bradley Corp., introduces its new and elegantly refined Verge™ Lavatory System for high-end commercial restroom applications. Characterized by its sleek and

modern design – as well as its durability and low-maintenance features – the Verge Lavatory System incorporates a beautifully sculpted elongated basin with a hidden drain, conveying upscale sophistication. Made with Bradley's new Evero™ Natural Quartz Material, a resilient natural composite material, the Verge stands up well to high-traffic and everyday usage. In keeping with its contemporary design, the lavatory system utilizes small proportions, including a minimalist trap cover to conceal plumbing below. For more information visit Bradley Corp. at www.bradleycorp.com/evero.

International Lubricants, Inc. announces the introduction of its new LUBEGARD Universal CVT Fluid P/N 67032. Designed to eliminate the need to stock various CVT fluids, LUBEGARD's CVT Fluid is a universal formula for use in any belt-type CVT transmission. Various CVT (continuously variable transmission) types require different base stocks and additive technologies, unlike regular ATF's. LUBEGARD, goal is to eliminate the costly inventories of multiple CVT fluids and provide a universal formula. For greater detail visit International Lubricants, Inc. at www.lubegard.com.

Dyson's Airblade™ hand dryer earned the Carbon Reduction Label from the Carbon Trust. Dyson research found that the manufacture of the new polycarbonate-ABS Dyson Airblade™ produces 50 percent less CO₂ emissions than the aluminum equivalent launched in 2007. The Carbon Reduction Label recognizes manufacturers' commitment to the further reduction of their product's carbon footprint - the amount of carbon emissions (CO₂ and other greenhouse gases) produced from its materials and manufacture, transport, in-use, and end of life. For additional details about the Dyson Airblade visit www.dysonairblade.com.

KNIPEX-Tools announces the CoBolt Compact Bolt Cutter. For easy, exceptional cutting performance, KNIPEX is one of the best small handheld cutters on the market. With a lever action design that provides 20 times more hand force than traditional bolt cutters, KNIPEX's Compact Bolt Cutter offers superior cutting power with minimal effort. Forged from oil-hardened chrome vanadium electric steel, this 8-inch hand cutter features precision matched, induction-hardened cutting edges that cut through ¼" diameter thickness with ease. For more information, please visit KNIPEX-Tools at www.knipex-tools.com.

Benjamin Moore's newest coating is called Advance, and for this reason: it is an alkyd-based interior paint powered by the brand's Gennex waterborne colorant system. Advance is truly an alkyd, not a hybrid, delivering all of the performance virtues demanded of an oil-based paint, yet has other characteristics common to latex. Advance cleans up with soap and water and is as green as they come, with a low-VOC content of less than 50 grams per liter, well below the 250 to 500 count for most other alkyds, and with significantly reduced odor. For more information about Benjamin Moore visit www.benjaminmoore.com.

Action Floor Systems, LLC releases a new 4-page, full-color wood overview brochure providing an introduction to the company's extensive line of solid-maple hardwood sports floor systems. Included is a new, quick-assembly-and-removal portable hardwood maple system (NitroPanel®) that delivers excellent performance characteristics, stability, and uniformity. Action Floor Systems manufactures a wide variety of hardwood sports floor systems to accommodate any application. The company specializes in high-performance sports floors constructed of hard maple timber grown exclusively in northern Wisconsin and Upper Michigan. Action Floor Systems also offers Herculan® polyurethane synthetic, RexCourt® vinyl sheet, and ReFlex® recycled rubber flooring products. For further information visit Action Floor Systems, LLC at www.actionfloors.com.
