ALGAE-X International announces its new catalog of programmable automated fuel filtration and tank cleaning systems, fuel conditioning, filters, fuel sampling and testing supplies, and accessories. The 32-page catalog showcases AXI's product lines: STS Automated Filtration Systems; SMART FPS Fuel Polishing Systems; MTC Mobile Tank Cleaning Systems; LG-X In-Line Fuel Conditioners, and AFC-705 Fuel Catalyst. Also included is detailed information on system configurations, flow rates, power requirements, dimensions, plumbing, spares, options, consumables, and a comprehensive filter reference chart. For more information visit ALGAE-X International at www.algae-x.net.

AEGIS™ iPRO prevents damage that could otherwise lead to generator or motor failure, unplanned downtime, costly repairs, and lost revenues. For greater detail visit Electro Static Technology at www.est-aegis.com.

InSite Solutions debuts its Superior Mark Corner, manufactured with their patent pending Superior Mark floor marking tape. The design features beveled edges and recessed adhesive to maximize durability. Their functionality is especially appreciated in large industrial facilities that are not only required to mark their floors to comply with OSHA regulations, but also utilize floor marking systems to improve organization and efficiency. Marking the floors of industrial environments is a challenge given the nature of the heavy traffic, such as forklifts that drag and push heavy skids around the clock. For additional details visit InSite Solutions at www.stop-painting.com.

Electro Static Technology introduces the AEGIS™ iPRO Bearing Protection Ring that extends the life of medium-voltage motors and improves the reliability of systems in which they are used by safely channeling harmful electrical currents away from bearings to ground. Specially designed for high-current applications, the AEGIS™ iPRO is ideal for protecting generators, turbines, and medium-voltage motors against electrical bearing damage. The rugged, highly reliable, and maintenance-free

ES Robbins Corporation

now features its new environmentally responsible ecoKLEER™ chairmat for home, commercial and office use. Made in the USA from Eastman Tritan™ copolyester, the impact and shatter resistant ES Robbins' ecoKLEER is the toughest alternative to a PVC chairmat on the market. Featuring a smooth, easy rolling surface, exceptional clarity and unparalleled sustainability, the ecoKLEER chairmat is odorless as well as BPA, EA, and Ortho-Phthalate-Free. For more information visit ES Robbins Corporation at www.esrchairmats.com.

Keil Refrigeration Hardware is proud to announce an innovation for walk-in cooler operations that meets the requirements of the Energy Independence & Security Act of 2007. The VXS-CFL series – Surface Mount Compact Fluorescent Refrigeration Lighting Fixture – is designed to provide ample light output while conserving energy and decreasing operational costs. The energy efficient spiral compact fluorescent lamp of the VXS-CFL Series outperforms that of conventional incandescent fixtures

with similar light output. It only draws 120V/26 watts, saving up to 75 percent more energy than standard 100W incandescent fixtures while still providing an incredible light output of 1650 lumens, which is more than 60 lumens per watt. For in-depth information contact Keil Refrigeration Hardware at www.keil-hardware.com.

Spectroline fluorescent dyes reveal all leaks in static and circulating water systems, boilers, storage tanks, and other high-volume containers. They also are extremely effective in locating leaks in piping, valves, condensers, sprinkler system pumps,

seams, welds, and fittings. With this leak detection method, you simply add a small amount of Spectroline WD-801, WD-802 or WD-803 fluorescent dye into a system and allow it to circulate. Wherever the water escapes, so does the dye, which remains at the site of all leaks. When the system is scanned with a high-intensity ultraviolet lamp, the dye glows brightly to pinpoint the precise location of every leak. For further information visit Spectroline at www.spectroline.com.

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, e-mail Gerry Van Treeck at gvtgvt@earthlink.net.
