

**Keil Refrigeration Hardware** is proud to announce an innovation for walk-in cooler operations that meets the requirements of the Energy Independence & Security Act of 2007. The VXS-CFL series – Surface Mount Compact Fluorescent Refrigeration Lighting Fixture – is designed to provide ample light output while conserving energy and decreasing operational costs. The energy efficient spiral compact fluorescent lamp of the VXS-CFL Series outperforms that of conventional incandescent fixtures

with similar light output. It only draws 120V/26 watts, saving up to 75 percent more energy than standard 100W incandescent fixtures while still providing an incredible light output of 1650 lumens, which is more than 60 lumens per watt. For in-depth information contact Keil Refrigeration Hardware at [www.keil-hardware.com](http://www.keil-hardware.com).

**Spectroline** fluorescent dyes reveal all leaks in static and circulating water systems, boilers, storage tanks, and other high-volume containers. They also are extremely effective in locating leaks in piping, valves, condensers, sprinkler system pumps,

seams, welds, and fittings. With this leak detection method, you simply add a small amount of Spectroline WD-801, WD-802 or WD-803 fluorescent dye into a system and allow it to circulate. Wherever the water escapes, so does the dye, which remains at the site of all leaks. When the system is scanned with a high-intensity ultraviolet lamp, the dye glows brightly to pinpoint the precise location of every leak. For further information visit Spectroline at [www.spectroline.com](http://www.spectroline.com).

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, e-mail Gerry Van Treeck at [gvtgvt@earthlink.net](mailto:gvtgvt@earthlink.net).
