Clean River Recycling Solutions has waste and recycling stations that make it easy to implement recycling programs and adjust to future changes. Transition™ TRH Series Configurable Recycling and Waste Stations use stream-specific, interchangeable opening plates and movable internal dividers to accept multiple types of recyclables in a single unit that is easily configured – and reconfigured – to meet current and future waste stream requirements. Transition™ TRH Series Configurable Recycling and Waste Stations make efficient use of floor space. The 51-gallon container occupies a 24" by 24" footprint and is 36" high. Twenty-two- and 36-gallon units occupy even less space. These containers are available in a variety of colors. The addition of full-color CleanSort™ graphic backboard signage makes Transition™ TRH Series recycling stations ideal for meeting rooms, lobbies and other upscale environments. To learn more about Clean River Recycling Solutions visit www.cleanriver.com.

Diversey, Inc. introduces the TASKI(r) Swingo 150 an ultra-compact, upright auto scrubber ideal for congested areas and daytime cleaning. Because floors dry immediately with this machine, the risk of slip and fall accidents are significantly reduced, and high hygiene standards are maintained. It is an ideal replacement for manual floor mopping—handy like a mop, effective like a machine. For more information, please visit Diversey at www.diversey.com/taski.

The Nyren Company represents manufacturers of institutional textile products. Providing the finest quality products at the lowest possible prices has been their commitment since 1963. Products include: towels & laundry bags, sheets, mattress pads and covers, mattresses and bed bug protection, blankets, pillows, shower curtains, laundry and utility

carts, cleaning cloths, and entrance and floor mats. Call for the APPA member's-only discount. To learn more about the Nyren Company visit www.nyren-tms.com.

Kasco Manufacturing announces the new Herd Model 2011SCP Skid Steer Mounted Scoop & Spreader. This salt/sand scoop features a unique agitator system for efficient deicing and effectively spreading any combination of wet or dry sand, salt or calcium chloride. Handles capacities of 1200 lbs. wet sand or 12 cubic feet of material. The 2011SCP is easy to use; simply tilt the hopper forward, push it into the sand or salt until full, tilt back and spread the sand or salt. The salt/sand scoop features a universal skid steer attaching design for easy compatibility and security. Additional features include hydraulic motor drive with cable controls, 10 gauge steel heavy duty hopper with powder coated finish, 3/8" x 4" durable cutting edge and rugged top bar grate. For more information, please visit Kasco Manufacturing at www.kascomfg.com.

Calpipe Security Bollards has developed a line of lighted security bollards that provide illumination to direct vehicles, guide pedestrians and light walkways but are strong enough to prevent vehicle incursion. Calpipe Security Bollards offers customization of the lighted security bollards, making them for low to high security applications, and collaborates with project managers, architects and contractors from the design and specification stage through installation. Designated the SSL Series, the lighted security bollards

are constructed of an inner core of carbon steel to withstand high-speed impacts and an outer sleeve of Type 304 stainless steel for aesthetics and durability in harsh environments. For indepth information contact Calpipe Security Bollards at www.calpipebollards.com.

Lochinvar's latest innovation is the SMART SYSTEM™ Multi Temperature Loop Control (MTLC). Designed to simplify the integration of KNIGHT Heating Boilers into multiple temperature hydronic heating systems, this compact and attractive accessory accurately controls up to three separate space heating loop temperatures, while maximizing the efficiency of the heating boiler as a primary function. The

new MTLC works in conjunction with the on-board SMART SYSTEM Control on all second generation floor-standing and wall-mount KNIGHT Heating Boilers for residential applications as well as KNIGHT XL Commercial Heating Boilers. For more information about Lochinvar and SMART SYSTEM™ visit www.lochinvar.com.

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, e-mail Gerry Van Treeck at gvtgvt@earthlink.net.
