StayDry Systems manufactures the StayDry Shower Curtain. APPA member and inventor, Tom Bryce, began manufacturing the StayDry Shower Curtain as a home business. It has since grown to a full-time business with sales to universities, hospitals, and senior care facilities all over the world. The unique shower curtains create a reusable watertight seal against any shower wall, including combination tub/shower units. The end results are clean, dry, and safe bathroom floors because the shower water now stays inside the shower. Some showers require longer extension shower rings and some of the newer non-lip shower stalls are using the collapsible water dam, both available from StayDry Systems. Overall great for students, conference guests, and staff. For more information about StayDry Systems visit www.staydrysystems.com.

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, e-mail Gerry Van Treeck at gvtgvt@earthlink.net.
