

water, and less energy per handwash. This saves money while protecting those who work at your facilities from the dangers of serious issues, such as occupational dermatitis. For additional information please contact Deb Group at www.debgroup.com.

Propane Educational & Research Council

promotes the Generac LP3250 portable generator. The Generac LP3250 portable generator was brought to market with the support of the Propane Education & Research Council (PERC). PERC promotes the safe, efficient use of odorized propane gas as a preferred energy resource through research and development, training, and safety programs. Managers can benefit from using propane-fueled equipment like the Generac LP3250 in several

ways. Unlike gasoline, propane does not degrade over time, virtually eliminating performance problems related to fuel quality. Propane also emits fewer carbon dioxide emissions and toxic pollutants than gasoline, improving the air quality for the crew on the job site. Finally, in many cases, propane fuel costs less than gasoline, providing savings. For more information about the Propane Educational & Research Council visit www.buildwithpropane.com.

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more

information or to submit a New Products listing, e-mail Gerry Van Treeck at gvtgvt@earthlink.net.
