EMERSON NETWORK POWER introduces the Liebert PDX and Liebert PCW compact perimeter cooling systems to help achieve the highest efficiency and protection with low capital, installation, and maintenance costs, as well as a compact footprint. Ideal for small and medium IT spaces and telecommunication switching offices, these thermal management systems replace the Liebert Challenger 3000 compact cooling system. The efficiency of the Liebert PDX perimeter cooling system exceeds new U.S. Department of Energy minimum efficiency standards for data center equipment. For additional information please visit Emerson Network Power at www.EmersonNetworkPower.com.

SERVICECHANNEL, a software as a service (SaaS) service automation platform for facilities managers and contractors, launches a new version of its mobile app that enables its customers to create, search, assign, resolve, and manage service orders more quickly and efficiently using mobile devices such as iPhones, iPads, Android smartphones, and tablets. The enhanced mobile app empowers facilities managers with the full advantage of the mobile enterprise, including higher levels of business agility and operational efficiency. Having access to “on-the-go” service automation, ServiceChannel customers can significantly accelerate the life cycle of their service workflow. For further information on ServiceChannel products visit www.servicechannel.com.

RUST-OLEUM can turn any wall into a writeable and erasable surface with new Write-On Paint. Write-On Paint is clear, so it can be used over any painted surface for a customized writable wall. The product features patented burst-pouch technology for no-mess mixing. Simply roll the pouch until the internal seal bursts, shake the contents to mix, pour into the paint tray, and apply by roller. Write-On Paint dries in 4 to 8 hours and is ready for use in three days. It's compatible with standard dry erase markers and cleaners. The low-odor formula makes it perfect for use in

offices, conference rooms, classrooms, and more. For more information on Rust-Oleum products visit www.rustoleum.com.

LEGEND BRANDS offers VersaClean portable extractors that deliver superior cleaning for carpets and hard surfaces. Professional cleaners now have a better option for high-performance cleaning when a truckmount isn't feasible—a new line of VersaClean portables with significant advantages. Legend

Brands engineers optimized the units' cubic-feet-per-minute (CFM) rate for better recovery and easier operation within the limits of 15-amp circuits. VersaClean portables use the best vacuum motor for long-lasting reliability and are more compact and balanced, which makes them much easier to move and fit into any van. The VersaClean lineup includes two 200 psi models and two 500 psi models that are ideal for carpet cleaning, as well as the 1200MS, an adjustable high-pressure unit for multiple surface cleaning. For more information regarding Legend Brands visit www.legendbrands.net.

GENETEC, INC., announced that its Genetec AutoVu Free-Flow, a new parking enforcement module for the AutoVu automatic license plate recognition (ALPR) solution, is now available. The new AutoVu Free-Flow module increases parking enforcement efficiency by providing a real-time inventory of vehicles parked illegally in monitored parking lots. AutoVu Free-Flow records the license plates of vehicles entering and leaving each parking lot and compares them to the list of payments received from connected pay-by-plate-enabled pay stations, permit management systems, and mobile apps. Vehicles that stay beyond their purchased parking period are flagged in a live report, highlighting violations awaiting

enforcement. AutoVu Free-Flow also automatically identifies returning scofflaws as they enter a parking lot and notifies parking enforcement officers of their arrival and location. For

further information on Genetec products visit www.genetec.com.

ADVANCE introduces the Advance FM810 ST and XP orbital scrubbing floor machines. By combining greater power with ease of use and versatility, the Advance FM810 models are specifically designed to provide enhanced cleaning performance and improved productivity in a wide range of both wet and dry cleaning applications. Both the FM810 ST standard model and XP deluxe model improve operator productivity by getting

floors cleaner with fewer passes, thanks to a 1.5 hp motor, 160 lbs. of down pressure, and a 3,540 rpm pad driver. In addition, strategically placed vibration-dampening materials make the FM810 quiet enough at high speeds to use even when a building is occupied. And both models are versatile enough to be used in hard-to-reach spaces such as corners and tight spaces, as well as on a variety of flooring including carpet, tile, marble, concrete, and terrazzo. For more information on Advance products visit www.advance-us.com. 

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, e-mail Gerry Van Treeck at gvtgvt@earthlink.net.
