**MARLEY ENGINEERED PRODUCTS** introduces advanced programmable heating with the Artisan SmartSeries Architectural Digital Wall Heater. The new wall heater automatically adjusts wattage output and blower speed, resulting in whisper-quiet operation and energy efficiency. The slim, stylish unit features 5-day/2-day programmability with four daily program periods to respond to a variety of environment needs, and an easy-to-use LED touchscreen thermostat. With its contemporary, smart design, the Artisan SmartSeries is ideal for numerous areas and commercial locations such as offices, lobbies, vestibules and restaurants. For greater detail contact Marley Engineered Products at [www.marleymep.com](http://www.marleymep.com).

**PRECISE PATCH, INC.** are concrete repair specialists, installing FlexKrete Technologies products. FlexKrete products can be used for flat, vertical, and overhead repairs. Near zero downtime; three times stronger than concrete; immune to salt, water, and rust. Install year around at temperatures as low as  $-25^{\circ}\text{F}$ ; open to traffic in 1 hour; installations as thin as 1/8 in. will not pop out. Your long-term solution for stairs, curbs, sidewalks, and roads. Eliminates long costly tear outs and resolves safety issues instantly. Please check out the link at <https://www.youtube.com/watch?v=GQJSwcPMUMM&feature=youtu.be>. For further information on Precise Patch, Inc. services call 216-598-8225.

**GREEN SPAN PROFILES** has added an insulated roof panel to its product line. RidgeLine is a patented 23/8-in.-tall mechanically seamed roofing panel covering 42 in., with thickness options of 2.5, 3, 4, and 5 in. The core is a continuously poured-in-place, polyisocyanurate insulating foam. Exterior and interior metal

panels are available in 26-, 24-, and 22-gauge Galvalume/G90 galvanized and stainless steel. Exterior finish is standard gloss polyvinylidene fluoride coating. RidgeLine panels can be used on slopes as low as 1/2:12

and are available in standard lengths measuring 12 to 53 ft., with custom lengths available on demand. For more information on Green Span Profiles products visit [www.greenspanprofiles.com](http://www.greenspanprofiles.com).

**CORENTIUM PRO** is a device that helps professionals elevate their work and bring new levels of accuracy and innovation to radon detection. This professional-grade product is AARST-NRPP certified by the American Association of Radon Scientists and Technologists. Features include mobile access and branded reporting, five years of data storage, built-in redundancy, and self-calibration (however, to comply with regulations in the United States, all continuous radon monitors have to be calibrated annually by a certified lab). It is also tamper-resistant with motion sensors, features built-in temperature, humidity, and pressure sensors to ensure accuracy with each reading, and is battery-powered to be easily portable. For more information on Corentium Pro visit <https://corentium.com/us/product/pro/>.

**REALVIEW, LLC** offers CommandScope, an all-digital, preplan technology that replaces bulky binders as a tool for first responders in saving lives and property in case of emergency. Developed by Chicago-based RealView, LLC, CommandScope provides first responders with critical knowledge of a building's characteristics and its occupants via a cloud-based program. It also is shareable with mutual-aid fire departments and law enforcement, eliminating guesswork for

first responders who have never set foot inside a building. For further information on RealView's Command-Scope visit [www.realviewllc.com](http://www.realviewllc.com).

**BRASS KNUCKLE**, a provider of safety solutions, introduces the SmartCut BKCR3520, an ANSI Cut Level 3 glove. Designed to combine medium-level cut protection with excellent abrasion and slip resistance, the 3520 also delivers a high level of dexterity. Its slip-resistant, foam nitrile palm coating provides a secure grip, and its reinforced thumb crotch offers excellent abrasion resistance in the glove's most critical wear area—between the thumb and forefinger. This unique feature prevents heavy chafing that can eventually wear down the glove's coating, making it unsafe to wear. For appli-

cations such as construction, electrical and general assembly, glass handling, HVAC, manufacturing, parts cleaning, vehicular construction, receiving, and sheet-metal handling, the 3520 is an ideal choice. For more information on Brass Knuckle

products, visit [www.brassknuckleprotection.com](http://www.brassknuckleprotection.com). 

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, e-mail Gerry Van Treeck at [gvtgvt@earthlink.net](mailto:gvtgvt@earthlink.net).
