first responders who have never set foot inside a building. For further information on RealView's CommandScope visit *www.realviewllc.com*.

BRASS KNUCKLE, a provider of safety solutions, introduces the SmartCut BKCR3520, an ANSI Cut Level 3 glove. Designed to combine medium-level cut protection with excellent abrasion and slip resistance, the 3520 also delivers a high level of dexterity. Its slip-resistant, foam nitrile palm coating provides a secure grip, and its reinforced thumb crotch offers excellent abrasion resistance in the glove's most critical wear area—between the thumb and forefinger. This unique feature prevents heavy chafing that can eventually wear down the glove's coating, making it unsafe to wear. For applications such as construction, electrical and general assembly, glass handling, HVAC, manufacturing, parts cleaning, vehicular construction, receiving, and sheet-metal handling, the 3520 is an ideal choice. For more information on Brass Knuckle products, visit *www.brassknuckleprotection.com*.

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, e-mail Gerry Van Treeck at *gvtgvt@earthlink.net.*
