

HOSPECO offers its broad line of SaniWorks Foodservice Towels to help prevent cross-contamination with more targeted, right-sized, and cost-effective solutions. Variations in performance, durability, duration of use, and size make SaniWorks the right foodservice towel line to meet a facility's specific applica-

tions and desired cost in use. Innovative, science-based products like our SaniWorks EPS (Enhanced Performance for Sanitizing) towels better ensure proper surface sanitizing and help prevent cross-contamination. The EPS towels are engineered to inhibit the active ingredient in most

sanitizers from binding with the towel, so the cleaning solution in the bucket gets into the towel and releases to the surface in the proper amount. Too little will result in an inadequate reduction of microorganisms; too much can be toxic, corrosive to equipment, and lead to less cleanability over time. For further information on HOSPECO visit www.hospesco.com.

BRONTO SKYLIFT introduces their Model S-174 XDT truck-mounted aerial platform. Model S-174 XDT is a telescoping/articulating aerial device that features a 174-ft. working height with a whopping 100 ft. of horizontal outreach, and up to 1,400-lbs. capacity in the spacious 93-in. x 36-in. platform. Mounted on a "go-anywhere chassis," the S-174 XDT allows you to drive to a location and raise the boom to precisely place the working platform almost anywhere on the tower. Setup is a breeze—a single control button activates the outriggers and leveling system, which can be positioned in less than a minute. Identical control panels are located on the platform and at the turntable control station for additional safety. For more information on Bronto Skylift visit www.brontoskylift.com. 

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, email Gerry Van Treeck at gvtgvt@earthlink.net.
