Compiled by Gerry Van Treeck

**SIEMENS** has modernized its Simatic RF300 RFID system by adding three new readers: RF310R, RF340R, and RF350R. They are integrated into the Simatic Step 7 engineering systems and the TIA Portal to make commissioning easy. The new readers offer an additional transponder protocol (air interface) for MOBY E transponders (MIFARE classic, ISO 14443 A) and automatic recognition of various types of transponder (RF300, ISO 15693, MIFARE classic). This makes migration from old systems easier and opens the way for new applications. The compact system is designed for controlling and optimizing the material flow in industrial production. For more information visit Siemens at [www.siemens.com](http://www.siemens.com).

## GEM-LOC PREMIER EDGE

incorporates a small but critically important accent using Corian to create an aesthetically delightful yet durable edge for laminate countertops. Gem-Loc is not only great for installation on new laminate surfaces such as workstations, laboratories, exam rooms and classrooms, but can even be retrofitted to existing areas. Gem-Loc adds minimal cost to laminate projects while providing the durability of Corian at all high-wear points. No more peeling laminate edges or the maintenance costs associated with them! Gem-Loc will not harbor bacteria and is significantly safer and more durable than traditional laminate edges. For more information on Gem-Loc Premier Edge products visit [www.loticorp.com](http://www.loticorp.com).

**OVERHEAD DOOR**, providers of doors and openers for residential, commercial, industrial, and transportation applications, has introduced EverServe, one of the industry's first standard rolling door systems to feature a springless barrel design with integrated shafts and an extended 500,000 cycle life. EverServe models are ideal for applications exposed to extreme weather, such as parking garages and manufacturing, pharmaceutical, warehouse, and distribution facilities. The three models (610S, 620S, and 625S) provide customers with high cycle performance, improved security, and durability, while delivering a reliable system and minimizing downtime with their ease of serviceability. For additional information on Overhead Door products visit [www.overheaddoor.com](http://www.overheaddoor.com).

**VORTEC** introduces Spray Nozzles for ultrafine, droplet-sized sprays ideal for evaporative cooling. An alternative to conventional hydraulic and piezoelectric nozzles, spray nozzles atomize the liquid stream with high-velocity compressed air to create a range of 20-200 micron-sized spray droplets, resulting in greater surface coverage than conventional nozzles. Droplet size and production are not dependent on liquid pressure, and the spray nozzles can produce finer drops than hydraulic nozzles. More efficient use of the liquid accelerates air-liquid interaction to give more effective cooling, while the smaller droplets expose more surface area, increasing the evaporation rate. Consistent and effective cooling of surfaces reduces heat distortion of parts. Three types of spray nozzles are available. For further information on Vortec visit [www.vortec.com](http://www.vortec.com).

**CASCADES PRO**, a manufacturer of towel and tissue products, has introduced two new Cascades Pro Tandem dispensing systems: Cascades Pro Tandem Electronic Hybrid and Double Jumbo Roll Tissue (JRT) dispensers. Both units have been designed to encourage healthier people, businesses, and bottom lines. Both deliver a healthy, clean environment with a hand-towel dispenser that seamlessly adapts to the needs of customers. Three versatile settings—Hidden Towel, Exposed Towel and Motor-Assist—combine to make the Cascades Pro Tandem one of the most adaptable towel-dispensing systems on the market. For more information on Cascades Pro visit [www.cascadespro.com](http://www.cascadespro.com).

## EXPANDED TECHNOLOGIES is

pleased to announce a new addition to their line of Floor Savers designed to eliminate noise and floor damage caused by wobble chairs. Wobble Chair Floor Savers are manufactured from soft, flexible material. They adhere quickly and securely to the bottom of the chairs, which are often used in classrooms. For greater design and detailed information on Expanded Technologies visit [www.expandedtechnologies.com](http://www.expandedtechnologies.com). 

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, email Gerry Van Treeck at [gvtgvt@earthlink.net](mailto:gvtgvt@earthlink.net).
