

**FLOOD BUZZ™ BLUE** is already in use by buildings to protect their premises from undetected leaking water heaters. Installation is easy. Just place the Flood Buzz™ Blue into a water heater's drip pan, use the attached double-stick tape to affix the Flood Buzz™ Blue to the water heater, and installation is complete. The Flood Buzz™ Blue is good for three years. For best protection, replace the Flood Buzz™

Blue by the "Replace by" date. The key to avoiding extensive damage is to catch the leak early—before it does extensive damage. The Flood Buzz™ Blue is specifically designed to monitor water heaters for leaks. For further information on Flood Buzz visit [www.floodbuzzpro.com](http://www.floodbuzzpro.com).

**PEOPLES ELECTRIC COMPANY**, a full-service electrical and building controls contractor, introduced its Unity Connected Building Intelligence smart lighting and building automation solution. Instead of approaching lighting, HVAC, and other major building functions separately, Unity offers a single technology platform for HVAC and lighting controls with a front end that can integrate with access control, low-voltage communications,

fire alerts, and renewables, among other building systems. Unity leverages the latest in money- and energy-saving LED lighting and controls with the data-sharing capabilities and scalability of the

Internet of Things (IoT). Data collected from built-in sensors in the fixtures gives building managers actionable information about occupancy, light levels, temperature, and more, with convenient, mobile, real-time dashboard access to all systems and data. For more information on Peoples Electric Company visit [www.peoplesco.com](http://www.peoplesco.com).

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, email Gerry Van Treeck at [gvtgvt@earthlink.net](mailto:gvtgvt@earthlink.net).
