

FILMOP now offers a 100%-metal-free MRI Cleaning System for magnetic resonance imaging (MRI) facilities. The cleaning cart has nonmetal lockable drawers, keys, screws, and plugs. These 100%-metal-free cleaning tools include mops, handles, and surface-cleaning tools. The cleaning cart is made with copolymer material, which is more

durable than single-polymer plastic. It absorbs shocks and won't break or crack on impact. Components are easily removed for complete cleaning and disinfection. For further information click on www.FilmopUSA.com.

PORTACOOOL JETSTREAM 230 is one of the newest additions to the Portacool Jetstream series. Rising temperatures, heat-generating machines, and tight working spaces can affect worker productivity and safety. Portable evaporative coolers may not be a traditional facility tool, but they can make all the

difference—making hot, open environments comfortable by providing cooling where a fan would blow hot air around and AC would be impractical. The Jetstream 230 features new oscillating louvers that effectively deliver cooling to up to 900 sq. ft. at 3,600 cu ft./min. Standing just over 4 ft. tall, the unit offers maximum versatility to accommodate a variety of work spaces. Additionally, it is equipped with Kuul Comfort MicroTech evaporative media, made in the United States exclusively for Portacool products. Additional information can be found at www.portacool.com/en/us/home. 

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, email Gerry Van Treeck at gvtgvt@earthlink.net.
