

**MEGGER** offers an advanced dual-channel time-domain reflectometer (TDR) that can detect illegal taps without having to power down the line being tested. The TDR2050 has a built-in, 600-V CAT IV input protection filter, enabling it to connect to known live lines.

This TDR features a large, color wide video graphics array (WVGA) display with easy setup features. Directional control buttons and soft keys provide intuitive, easy operation for the user.

A built-in AutoFind mode allows for speedy identification of faults. One press of the AutoFind key automatically adjusts the range and gain, while positioning the cursor to the first major event on the cable; press the key again and the cursor jumps to the next detected disturbance. Perfect for locating faults on paired metallic cables by electrical service contractors, telecommunications technicians, and cable television workers, the TDR2050 includes an auto selection option to ensure that the most effective parameters are chosen depending on the range required, aiding rapid diagnosis of the TDR trace. A manual override on the unit allows for fine tuning to enable identification of hard-to-find faults. For detailed information on Megger visit <http://us.megger.com/blog>.

### CUSTOM EQUIPMENT

**LLC** introduces the all-new, PA-1030 push-around lift as a safer, more productive alternative to ladders and scaffolding. The PA-1030 easily enables users to manually maneuver the unit into place and hydraulically raise and lower it to the desired work height. The push-around lift segment is quickly becoming one of the fastest-growing segments of lifts, as maintenance and safety managers look for more effective ways to provide increased safety and productivity in applications where ladders and scaffolding are commonly used, such as general construction, facility maintenance, and manufacturing. For additional information on Custom Equipment LLC visit [www.hybridlifts.com](http://www.hybridlifts.com). 

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, email Gerry Van Treeck at [gvtgvt@earthlink.net](mailto:gvtgvt@earthlink.net).
