CASCADES INC., a manufacturer of green packaging and tissue products, announces the launch of the Latte Collection. Available within the Cascades PRO Select and Cascades PRO Perform collections of paper towels, toilet paper, and facial tissue, this new line is manufactured from a combination of white recycled fiber and cardboard, providing customers with a solution that delivers the same great performance as white paper products, but at a reduced cost. For additional detailed information on Cascades Inc. visit www.pro.cascades.com.

For added utility, the 40-in. Steel Work Cart also comes equipped with movable utility shelves. For more information go to Milwaukee online at www.milwaukeetool.com.

QUASAR bottle fillers utilize an energy-efficient, ecologically smart LED to deliver UV light, specifically UV-C, to cleanse drinking water as it comes out of the dispenser. QUASAR fillers achieve a 99.99 percent reduction of common waterborne pathogens, including giardia, legionella, listeria, cryptosporidium, shigella, and E. coli, among others. When paired with OASIS water filters, also available with each unit, QUASAR provides the ultimate in safe, pure, pathogen-free drinking water. QUASAR's exclusive UV-C LED is active directly at the dispense point, offering a number of advantages. For more information on QUASAR visit www.oasiscoolers.com.

LUMILEDS introduces the LUXEON IR 2720 line, high-power infrared emitters for abundant radiant power delivered in an industry standard package for seamless integration in existing designs. The

emitters provide high radiant power of up to 1,300 mW at 940-nm wavelength or 1,250 mW at 850-nm wavelength, and feature high efficacy and a popular 120° beam angle. The 2.75 x 2.0 mm LEDs are undomed and especially useful for applications with package height limitations that prevent the use of domed solutions. The emitters address a wide array of cost-conscious infrared applications, from surveillance and machine vision to iris scanning and health monitors. For more information about Lumileds visit lumileds.com.

MILWAUKEE announces the addition of a 40-in. Steel Work Cart to their popular offering of steel storage solutions. The new 40-in. Steel Work Cart is constructed with a reinforced frame, 5-in. industrial casters, and a 700-lb. weight capacity for ultimate durability. The cart includes 100-lb. soft-close drawer slides, a built-in power center for instant access to power, removable storage cups, and an integrated wire spool holder.

STAYDRY SHOWER SYSTEMS has two styles of extra-long shower rings/hooks that can add from 3.0 in. up to 8.5 in. to any shower curtain. These extra-long rings or hooks can save you the time spent having to move your shower rod, and save you from spending more funds to purchase a longer shower curtain or having a custom shower curtain made for your specific installation. The rings are designed to work on a standard residential shower curtain rod with a diameter of 1.0 in. or on a commercial shower rod with a diameter of 1.25 in.

Now you can keep your bathroom floors clean, dry, and safe by having a shower curtain of appropriate length. For more information, please visit StayDry Shower Systems at <https://staydrysystems.com/shop/extra-long-shower-rings> and <https://staydrysystems.com/shop/extra-long-shower-rings-institutional>.

MEGGER offers an advanced dual-channel time-domain reflectometer (TDR) that can detect illegal taps without having to power down the line being tested. The TDR2050 has a built-in, 600-V CAT IV input protection filter, enabling it to connect to known live lines.

This TDR features a large, color wide video graphics array (WVGA) display with easy setup features. Directional control buttons and soft keys provide intuitive, easy operation for the user. A built-in AutoFind

mode allows for speedy identification of faults. One press of the AutoFind key automatically adjusts the range and gain, while positioning the cursor to the first major event on the cable; press the key again and the cursor jumps to the next detected disturbance. Perfect for locating faults on paired metallic cables by electrical service contractors, telecommunications technicians, and cable television workers, the TDR2050 includes an auto selection option to ensure that the most effective parameters are chosen depending on the range required, aiding rapid diagnosis of the TDR trace. A manual override on the unit allows for fine tuning to enable identification of hard-to-find faults. For detailed information on Megger visit <http://us.megger.com/blog>.

CUSTOM EQUIPMENT

LLC introduces the all-new, PA-1030 push-around lift as a safer, more productive alternative to ladders and scaffolding. The PA-1030 easily enables users to manually maneuver the unit into place and hydraulically raise and lower it to the desired work height. The push-around lift segment is quickly becoming one of the fastest-growing segments of lifts, as maintenance and safety managers look for more effective ways to provide increased safety and productivity in applications where ladders and scaffolding are commonly used, such as general construction, facility maintenance, and manufacturing. For additional information on Custom Equipment LLC visit www.hybridlifts.com. 

New Products listings are provided by the manufacturers and suppliers and selected by the editors for variety and innovation. For more information or to submit a New Products listing, email Gerry Van Treeck at gvtgvt@earthlink.net.
